SUGGESTIONS
11 Actionable Items

> 💬 *DeadSoul's Brief: "effective suggestion chaiye, jo hume team me dalne ke liye jadha discuss na karna ho aur bas dalne se faidha hi ho"*

Priority Overview

P1 — Do It Today

- Auto-Warning Bot (MEE6/Wick)
- LOA Request Channel
- Dedicated Ticket Department

P2 — This Week

- Verification Gate
- Trial Mod Mentorship Pairing
- Activity Minimum Standards

P3 — This Month

- StatBot Weekly Auto-Report
- Staff Strike System
- Weekly Community Events

P4 — Nice to Have

- Member of the Week
- Server Feedback Channel

Department Structure

3 suggestions

1 Dedicated Ticket Department

P1

Assign 2–3 Full/Head Mods specifically to handle tickets full-time with a **[Ticket Dept]** role tag. No new hiring needed — just formalise existing staff.

WHY IT WORKS

- ✓ Tickets currently fall on whoever's online — inconsistent response times
- ✓ Ticket ownership = faster resolutions + clear accountability
- ✓ Directly enforces existing policy (Trial Mods can't solve tickets)
- ✓ Zero cost — uses existing staff, zero new hiring

⏱ 10 min setup | Very High Impact | No budget needed

2 Media / Content Moderation Role

P2

Assign 1–2 mods specifically to monitor media channels, image posts, and file uploads for spam, NSFW, and malware links.

WHY IT WORKS

- ✓ Most servers get hit with NSFW/spam in media channels before chat mods notice
- ✓ Specialized eyes = faster catches = less damage to server reputation
- ✓ Easy to implement — assign existing reliable mods to a new role tag

⏱ 5 min setup | High Impact

3 Trial Mod Mentorship Pairing

P2

Each Trial Mod gets officially paired with a Full Mod as their mentor. The mentor guides and vouches for them during trial period.

WHY IT WORKS

- ✓ Reduces leadership burden — mods train mods, not heads train mods
- ✓ Gives Trial Mods clear guidance on what's expected
- ✓ Makes promotions easier — mentor can formally vouch
- ✓ Zero budget, zero new systems, zero new tools needed

TRIAL MOD	SUGGESTED MENTOR
ProtexReaper	NeoSpectra
CHEF	Zazzy
potato	Vansh (Meoww)
KuzeNikhil	opgamer
DeadSpider	NeoSpectra
Jangli Billi	Zazzy
Nexaa	opgamer
VoidSoul	Vansh (Meoww)
wiz	Zazzy
perk adverd	NeoSpectra

⏱ 0 min (just announce) | High Impact

Automation & Bots

3 suggestions

4 Auto-Warning System (MEE6 / Wick Bot)

P1

Configure automated escalation: warn → mute → kick → ban for common violations like spam, slurs, raid-pings, and excessive caps.

WHY IT WORKS

- ✓ Mods don't have to manually type warnings for obvious violations
- ✓ Consistent punishment across all mods — eliminates bias claims
- ✓ MEE6/Wick used in 90%+ of large Discord servers — proven solution
- ✓ Takes 15 minutes to configure — zero ongoing maintenance

⏱ 15 min setup | Very High Impact | Bot: MEE6 or Wick

5 Verification Gate

P2

New members must complete a simple verification (react to message, answer question, or solve a captcha) before accessing the server.

WHY IT WORKS

- ✓ Stops bot raids and nuker accounts completely
- ✓ Reduces Trial Mod workload on dealing with obvious bot accounts
- ✓ Built into Carl-bot / Wick Bot — zero coding, zero cost
- ✓ Best practice for any Discord server above 100 members

⏱ 15 min setup | High Impact | Bot: Carl-bot / Wick

6 StatBot Weekly Auto-Report (Already Installed)

P3

Use the existing StatBot to auto-generate a weekly staff activity report in a private leadership channel. Zero new bots needed.

WHY IT WORKS

- ✓ StatBot is already installed and tracking all 17 staff members
- ✓ Leadership can check staff activity passively — no manual auditing
- ✓ Takes 5 minutes to configure the scheduled report command
- ✓ Saves hours of manual tracking per month

⏱ 5 min setup | Medium Impact | Already installed

📋 Process & Policy

3 suggestions

7 Formal LOA (Leave of Absence) System

🔥 P1

Create a **#loa-requests** channel with a pinned format template. Staff officially announce planned inactivity in advance.

WHY IT WORKS

- ✓ Right now inactive staff just go ghost — leadership has zero warning
- ✓ LOA system = mods stay accountable without being punished for real life
- ✓ Reduces unnecessary demotions of good mods with temporary issues
- ✓ Zero setup cost — just create a channel + pinned message template

```
📋 LOA REQUEST
Name:
Duration:
Reason (optional):
Coverage needed: Yes / No
```

⏱ 5 min setup | 🟢 Very High Impact | Zero cost

8 Monthly Activity Minimum Standards

⚡ P2

Write and publish clear, measurable activity minimums for each staff rank — visible to all staff in a pinned document.

ROLE	MIN. MESSAGES/WEEK	MIN. MOD ACTIONS/WEEK
Trial Mod	30 messages	3 warns/mutes
Full Mod	50 messages	8 warns/mutes
Head Mod	30 messages	Leadership duties count

WHY IT WORKS

- ✓ Currently no written standard — demotions feel subjective and cause drama
- ✓ With written standards, demotions/promotions are obvious and drama-free
- ✓ StatBot already tracks all this data — just need to write the policy

⏱ 30 min (write doc) | 🟡 High Impact

9 Standardised Strike System for Staff

P3

An internal 3-strike system for staff discipline. Transparent, consistent, and removes bias from leadership decisions.

STRIKE TRIGGERS (EXAMPLE)

- ✓ **Strike 1:** Unexplained inactivity over 1 week
- ✓ **Strike 2:** Unprofessional behaviour in public channels
- ✓ **Strike 3:** Policy violation (e.g., Trial Mod handling a ticket without assignment) → demotion

⏱ ~1 hr (write policy) · Medium-High Impact

Community Growth

2 suggestions

10 Member of the Week Recognition

P4

Highlight an active, positive community member each week in announcements. Simple weekly post by any Head Mod.

WHY IT WORKS

- ✓ Encourages positive engagement — members compete for recognition
- ✓ Costs nothing, takes 5 minutes per week
- ✓ Carl-bot starboard/highlight feature already handles nominations

⏱ 5 min/week · Easy win

11 Server Feedback / Suggestions Channel

P4

A **#suggestions** channel with upvote/downvote reactions. Carl-bot auto-formats posts and threshold-based pins highlight the best ideas.

WHY IT WORKS

- ✓ Members feel heard = better retention and community loyalty
- ✓ Leadership gets real community insights passively without asking
- ✓ Carl-bot suggestion feature is zero-cost and zero-maintenance

⏱ 5 min setup · Easy win

Full Priority Reference

PRIORITY	SUGGESTION	SETUP TIME	IMPACT	COST
🔥 P1	Auto-Warning Bot	15 min	● Very High	Free
🔥 P1	LOA Request Channel	5 min	● Very High	Free
🔥 P1	Ticket Department	10 min	● Very High	Free
⚡ P2	Verification Gate	15 min	● High	Free
⚡ P2	Mentorship Pairing	0 min	● High	Free
⚡ P2	Activity Standards	30 min	● High	Free
📌 P3	StatBot Weekly Report	5 min	● Medium	Free
📌 P3	Staff Strike System	~1 hr	● Medium-High	Free
💡 P4	Member of the Week	5 min/wk	● Easy Win	Free
💡 P4	Feedback Channel	5 min	● Easy Win	Free

✅ **All P1 suggestions are zero-cost and zero-discussion**

They require no new budget, no new hiring, and no new bots — just configuration of existing infrastructure and formalisation of what should already be happening.

💡 **Recommended Heads GC Approach**

Present P1 items in one message today. Once approved, follow up with P2 the next day. This way leadership never feels overwhelmed by too many changes at once.
